Ljubljana - august 1971

SCIENCES, HUMANITIES, EDUCATION

CONTENTS

MEDICAL APPLICATIONS

R. Tomović, M. Gavrilović, M. Marić, Computer coordinated remote manipulation	1
A.A. Popov, V.A. Shul'ga, V.M. Yanenko, A.D. Krisilov, Automation of the medical diagnostic process	6
D.O. Walter, M. Roux, J. Gouvernet, H. Roux, Applications of Kendall's ordinal discriminant analysis method to two medical classification problems	12

WHAT SHOULD WE TEACH?

T.F. Piatkowski, A novel and versatile approach to computer hardware education and to computer and computer terminal development	17
P. Wegner, A view of computer science education	22
I. Fernandez-Florez, E. Camarero, I. Ramos, A basic language oriented to secondary schools	29

ART AND HUMANITIES

H.B. Lincoln, Toward a computer typography for music research: a progress report	32
A.I. Polovinkin, V.I. Polovinkin, On the use of computers in painter's work	36
R.P. Swierenga, Computerized historical research in the USA: a survey and evaluation	41
J.D. Smith, A computational analysis of imagery in James Joyce's "A Portrait of the Artist as a Young Man"	46
N.V. Findler, H. Klein, W. Gould, A. Kowal, J. Menig, Studies on decision making using the game of poker	50
G. Stiny, J. Gips, Shape grammars and the generative specification of painting and sculpture	62

SOCIAL AND MEDICAL DATA

K.F. Bowden, I.R. MacCallum, S.P. Patience, Data structures for general practice records	68
A.R. Butler, Record linkage: adaptive decision techniques in file processing	76
C. Beaugas, G. Vallee, J.C. Savoie, Progressive design of models using a system identification language	81
B. Levrat, J.-Ph. Baud, J.-M. Chenais, A. Jacquesson, L. Pany Hervieu-Causse, Experimenting with information management by individuals in a university environment	86
R.C. Mendelssohn, Data banks and information systems for national statistics	91

DESIGN AND ADMINISTRATION OF EDUCATIONAL SYSTEMS

D. Pager, On the problem of communicating complex information	97
S.R. Wilson, Administration of education - a new systems approach	103
D. Klahr, C.H. Kriebel, R.L. Van Horn, A design for an educational assembly system	107

TEACHING PROGRAMMING

A.C. Shaw, N.H. Weiderman, A multiprogramming system for education and research	110
B.W. Arden, L.K. Flanigan, B.A. Galler, An advanced system programming course	115
H.K. Urion, CUM LAUDE: a new approach in designing computer-assisted language instruction programs	120
V.W. Setzer, C.H. Warlick, A unified approach to compiler theory and construction	125

APPLICATIONS IN SCIENCE AND MEDICINE

C.K. Chow, T. Kaneko, Boundary detection of radiographic images by a threshold method	130
S.M. Pizer, S.J. Harris, L.A. Deveau, M.-D. Cohen, Time-shared clinical radioisotope scan collection, processing and retrieval	135
W.P. Wilson, A.O. Bishop, Jr., Digital filters applicable to electroencephalographic pattern recognition	141
H.S. Schloss, Computation of solutions to the inverse problem of electrocardiography	145
C.D. Barry, R.A. Ellis, S.M. Graesser, G.R. Marshall, CHEMAST: a computer program for modelling molecular structures	150
