

# COMP 190-088: Systems Performance Analysis

## *Project Submission # 1*

**Due on: 2/18/05**

---

**Note:** *Please typeset your submission in a font no smaller than 12 pt.*

---

Prepare a project plan that briefly describes the following:

1. Problem statement:
  - Specify the system, its services, the performance analysis problem and its significance.
2. Performance metrics:
3. Parameters:
  - Specify and distinguish between system parameters and workload parameters.
4. Workload generation methodology
5. Measurement technique
6. Evaluation techniques to be used
  - Include prototype measurement, and at least one out of modeling and simulation

Also specify a rough time-line for achieving intermediate steps.
