

COMP 15 Programming Assignment 1

Name: _____

“I have neither given nor received unauthorized aid in this assignment”

Signature: _____

Directions: When your program is ready do the following:

1. Make sure your name and the assignment number are listed as comments at the top of your program.
2. Save your program onto a floppy disk. First be sure your program is saved in its permanent location, then use the *File/Save buffer as...* menu in *emacs* to write a copy onto the floppy disk, for example as `A: /prog1.hs`.
3. Print a copy of your program. On ATN machines you can use the *emacs Tools/ Print Buffer* menu to print a copy on the nearest printer. This may not work if you have *emacs* installed on a personal machine with a printer. Printing can always be accomplished by loading the file (e.g. `A: /prog1.hs`) into a utility like Notepad or WordPad and printing from there.
4. Bring the floppy and the listing to Sitterson 030 during one of the submission periods: Wed Sep 8 4-6 PM and Thu Sep 9 4-6 PM. Note that Sitterson exterior doors are locked at 6 PM and please remember that late programs are not accepted.
5. Complete the lines above and staple this sheet to the listing of your program. Be sure to sign on the line under the pledge above.
6. Find an available machine, insert your floppy, and run your program using *emacs*. Signal the TA or the instructor when you are ready. One of us will come to your machine, look at your listing, and perhaps try your program on some inputs. We will also direct you to save a copy of your program on a CS file server.
7. That's all, you're done!

Correctness:
