Formatting in context
Formatting by section context snippet

- Paragraph in each section may want to look different
  - Smaller in header or footer
- Lists
  - No bullets
  - In a line
  - Different spacing
Selecting one of several definitions for the same tag

- Name the context in the css by using a space

```css
header p {
  text-align: center;
}
footer p {
  text-align: right;
}
```
