Excel MATCH

Finding a value in an array
MATCH

- Finding the location of a value
  - Complement of INDEX
  - INDEX extracts; MATCH returns the location

- Two versions of MATCH: exact or range
Finding a Value in an Array

- **MATCH**: a value from a list
  - Example:
    - MATCH(looking-for, list-of-possible[, match type])
    - Returns the position

- **Match-type**
  - 1 largest value less than or equal
  - 0 exact
  - -1 smallest value greater than or equal

(Worksheet MATCH)
