Mr. Data Converter
Getting Tables to the Web

- **Mr. Data Converter**
  - Sets up classes
  - Formatted
  - Caveat: it requires that there be a value in the upper left cell
Using Komodo Tools

- Find/Replace is your friend
- Resources page on website
- Regular Expressions
  - Komodo Primer
  - Python (what Komodo uses)
  - Notes
Regular Expressions

- allow you to match other than an exact string

Key capabilities

- \w any alphanumeric
- \s any space (including across lines)
- [] any of the enclosed
- + 1 or more
- * 0 or more
Table cleanup

- From Mr Data Converter
  - `class="[\w-]+"`
  - Will match all of the classes generated
