Tables will adjust columns based on content

What if you want them fixed width?

- Fixed and same
  ```
  col {
    width: ...;
  }
  ```

- Fixed and different
  ```
  <table>
    <col width="...">
    <tr>
      OR class per td (but have to put it on every td)
      (will look at alternative for Thursday)
  ```
Centering Tables

- They have width. Use margins.
- Elements in table can have any text align you want
- Remember display: table;
