

## **Assignment 06**

Assigned 23 February 2024

Due 1 March 2024

### **Study:**

1. How to Read a Paper by S. Keshav
2. Helpful Hints on reviewing project proposals (from NSF)
3. Tips and Considerations for a Constructive Peer Review Experience by Cutler and Beddoes (from NSF)

All of the above are linked on the class website (see “Assignments”)

**Select** any research publication from your area of research. It should ideally be an ACM or IEEE conference. The publication should be at least 6 pages long.

**Write a review** for this paper assuming that you are a member of the Technical Program Committee of the conference where this paper has appeared. Follow the principles discussed in the class and in the three articles/guides listed above.

In case you have never seen a review of a conference paper yourself, ask a fellow student or a faculty member for some (more than one) samples and study them first. A sample review is included for your reference (see sample\_review.txt).
