Final Exam Review Session

April 29th 2023 | COMP 211-002 | Joshua Bakita
Welcome!

This afternoon:
➔ Brief announcements
➔ Recommendations for exam studying
➔ Questions in groups

Starting around 2:30:
➔ Build a computer (if you'd like)

Fun fact…

We're almost done!
Brief announcements

➔ Extra 25 hours on Assignment 5
  ◆ Now due 1 PM on Wednesday, May 3rd
  ◆ Just in case there are more server issues
➔ submit_a5 now available
➔ Final Exam Study Guide posted
➔ Final Exam Review Session Questions posted for today
➔ All class recordings posted
Exam Studying Suggestions

First review any lectures you missed:
➔ Watch the recordings. You'll miss a lot just looking at the slides.

Find something confusing in a recording?
➔ Consult the reading for that class
➔ Ask on Piazza

Look through the exam topics guide. Anything there not familiar? Review the associated class/assignment.

Review all your assignment implementations:
➔ Review the manpages or readings for anything that doesn't make sense

When looking at the readings, consider reading the whole chapter if most of it was assigned.
➔ Most of the surrounding readings build on or supplement the assigned readings

Let's take a look at the Final Exam Study Guide, with context.
Group Problem Solving

See the question list linked on the website. Let us know if you need help finding a group to solve problems with.
Thank you all!

For those who expressed interest in research, expect to hear more as soon as I finish computing final grades.
